

AGRO-COMMODITIES SPECIALISATION FOR THE AGRI-FOOD SECTOR

PORT OF Bilbao

Bilbao is located in a region with more than 2 million inhabitants and a productive environment that generates an important volume of trade in agribusiness and the food industry.

The port of Bilbao concentrates an important number of companies with a wide range of products and services linked to the logistics of the agri-food business, biofuels and other agricultural products: agency, chartering, port handling, storage, road transport, customs clearance, quality certifiers and many others.

In addition, the available capacity of new docks and communications with its hinterland makes it an excellent location for the development of new businesses linked to the international agro-commodities trade.

Comunidad Portuaria

THE PORT AUTHORITY

The port of Bilbao handled a total of 31 million tons, of which almost 2 million were agri-foodstuffs,

solids and liquids.

Bilbao offers 402 hectares of surface area for various facilities and 57 hectares in the two Dry Ports it manages, located in Burgos and Álava.

It is currently expanding capacity and will have 50,000 m² available for bulk solids handling by 2022. The second phase of the Central Breakwater will also provide 300,000 m² of new surface area.

The Administration of the Port of Bilbao is under the responsibility of the Port Authority of Bilbao. Among other functions, it organises the uses of the port service areas and manages the port land through concessions and authorisations, applying criteria of efficiency and profitability.

Development of Infrastructures

Since 1992, it has invested nearly 500 million euros, developed more than 2 million m² of port area and reclaimed 3 km of quays.

- 500,000 m² of surface area available for industrial uses and commercial activities with a 21 m. draught.

LIQUID BULKS

TEPSA Rubis Terminal specialises in the reception, storage and dispatch of all types of liquid bulks, including foodstuffs and products for the manufacture of biofuels.

It has recently celebrated its 50th anniversary in Spain with an outstanding presence in the port of Bilbao, where it has a storage capacity of 321,900 m³.

Its terminal comprises 79 separate tanks for a wide range of products.

Its facilities include its own railway terminal, which allows it to serve both customers who need to receive or dispatch by truck, as well as those who have a railway connection within the Iberian Peninsula, and it is also prepared to supply other nearby European markets (France).

Since 2020, TEPSA has been part of the Rubis Terminal Group, a leading independent liquid bulk storage company with more than 15 terminals in France, the Netherlands, Belgium and Spain. Sustainable storage solutions for everyday life!

AGRI-FOOD LIQUID BULKS

Established in 1951, is a logistics terminal with extensive experience in the reception, storage and dispatch of agri-food liquid bulks. It has a strong commitment to safety and respects the applicable FAO and WHO directives on quality and safety in the storage and handling of these products.

It offers storage services for liquid bulks, ensuring the best traceability of the product.

It has all the health authorisations, as an animal and human food operator, for the treatment of Sandach and ISO9001 quality certificate and ISCC sustainability certificate.

DEPOSA offers:

- 34 heated and thermally insulated carbon steel tanks, with a maximum height of 16 m.
- Total capacity of 32,000 m³ in tanks from 150 m³ to 2,000 m³.
- In-bond storage facilities adapted to your needs.
- 500 m quay with connection chambers every 50 m. Maximum draught between 9.5m and 10m.
- Sea, land or rail access.
- Permanent personalised attention provided by experienced and qualified staff.

OILSEEDS & BIOFUELS

Established in 1818, it is one of the world's leading agribusiness and food companies.

With integrated operations around the world, from the farm field to the retail shelf. It operates a global network of facilities including grain elevators, oilseed processing plants and port terminals located in the world's largest agricultural production regions, in fast-growing food consumption areas and near major transportation systems.

The maritime terminal

In the port of Bilbao, the main activities are: the processing and milling of soya to obtain flour for agro-industry, as well as crude vegetable oil for sale to livestock producers, mills, food processors and the biofuel industry.

Its yearly soybean milling production is around 1 million tonnes.
